A Detected result is considered a positive test result for COVID-19. If requested by public health authority, specimen will be sent for additional testing.

CRITICAL VALUE REPORT

Please review the "Fact Sheets" and FDA authorized labeling available for health care providers and patients using the following websites:
<https://www.questdiagnostics.com/home/Covid-19/HCP/QuestLDT/fact-sheet>
<https://www.questdiagnostics.com/home/Covid-19/Patients/QuestLDT/fact-sheet.html>

This test has been authorized by the FDA under an Emergency Use Authorization (EUA) for use by authorized laboratories.

Due to the current public health emergency, Quest Diagnostics is receiving a high volume of samples from a wide variety of swabs and media for COVID-19 testing. In order to serve patients during this public health crisis, samples from appropriate clinical sources are being tested. Negative test results derived from specimens received in non-commercially manufactured viral collection and transport media, or in media and sample collection kits not yet authorized by FDA for COVID-19 testing should be cautiously evaluated and the patient potentially subjected to extra precautions such as additional clinical monitoring, including collection of an additional specimen.

Methodology: Nucleic Acid Amplification Test (NAAT) includes PCR or TMA

Subject: Compassionate Release/Reduction in Sentence

To: HORNEZES, John James
Reg. No. 38751-068
Unit FB

This is in response to your request for a reduction in sentence (RIS) based on underlying health issues and concerns about COVID-19.

Title 18 of the United States Code, section 3582(c)(1)(A), allows a sentencing court, on motion of the Director of the BOP, to reduce a term of imprisonment for extraordinary or compelling reasons. BOP Program Statement No. 5050.50, Compassionate Release/Reduction in Sentence: Procedures for Implementation of 18 U.S.C. §§ 3582(c)(1)(A) and 4205(g), provides guidance on the types of circumstances that present extraordinary or compelling reasons, such as the inmate's terminal medical condition; debilitated medical condition; status as a "new law" elderly inmate, an elderly inmate with medical conditions, or an "other elderly inmate"; the death or incapacitation of the family member caregiver of the inmate's child; or the incapacitation of the inmate's spouse or registered partner. Your request has been evaluated consistent with this general guidance. Health Services staff have reviewed your medical records and determined you do not meet the criteria for a compassionate release/reduction in sentence at this time.

The BOP is taking extraordinary measures to contain the spread of COVID-19 and treat any affected inmates. We recognize that you, like all of us, have legitimate concerns and fears about the spread and effects of the virus. However, your concern about being potentially exposed to, or possibly contracting, COVID-19 does not currently warrant an early release from your sentence. Accordingly, your RIS request is denied at this time.
